REPLY DATE: 20 Apr 2017	REPLY TIME: 18:	REPLY SIGNATURE/POSITION:
----------------------------	--------------------	---------------------------

Special Instructions:

Messages are written in this form as single words for each word line to facilitate legibility and accuracy. Printing is encouraged over cursive. If there is a discrepancy of word count between the originating station and the receiving station, the message will need to be reviewed for accuracy. For example, clarification could include "all after word #"

Punctuation marks count as a word. A question mark (?) is spoken as "query" or "question mark." A period is indicated by "x" and spoken as "x-ray." Commas and other punctuation generally are not used in formal messages.

Plain language is encouraged. Avoid word contractions; for instance, use "cannot" in place of "can't" and "I will" in place of "I'll." Especially important numbers may need to be spelled out for clarification.

Options for Precedence (importance) on Side 1: Routine (R) – seldom used in disaster situations; Welfare (W) – health and welfare of an individual; Priority (P) – important messages with a time limit but not Emergency; Emergency (always spelled out)—life or death urgency, including critical supplies, assistance, aid or relief

ARRL Emergency Communication Handbook, 2009, p. 7-2. We need to coordinate with SLC Em Mgt about precedences.

Special Instructions:

Messages are written in this form as single words for each word line to facilitate legibility and accuracy. Printing is encouraged over cursive. If there is a discrepancy of word count between the originating station and the receiving station, the message will need to be reviewed for accuracy. For example, clarification could include "all after word #" Punctuation marks count as a word. A question mark (?) is spoken as "query" or "question mark." A period is indicated by "x" and spoken as "x-ray." Commas and other punctuation generally are not used in formal messages. Plain language is encouraged. Avoid word contractions; for instance, use "cannot" in place of "can't" and "I will" in place of "I'll." Especially important numbers may need to be spelled out for clarification.

Options for Precedence (importance) on Side 1: Routine (R) – seldom used in disaster situations; Welfare (W) – health and welfare of an individual; Priority (P) – important messages with a time limit but not Emergency; Emergency (always spelled out)—life or death urgency, including critical supplies, assistance, aid or relief

ARRL Emergency Communication Handbook, 2009, p. 7-2. **We need to coordinate with SLC Em Mgt about precedences.**
